A Jewelry Designers Dream Tool

Jewelry CAD Dream

USED BY AWARD WINNING JEWELRY PROFESSIONALS AND ASPIRING JEWELRY DESIGNERS WITH A SELECT TASTE FOR QUALITY JEWELRY DESIGN CAD SOFTWARE.

Since CAD has arrived in the jewelry industry, the design software available to the general market has been dominated by low end modeling engines. Many of these low level engines have jewelry plugins that charge high end prices. These programs can get the job done, but at a major loss for time. They lack the tools that midrange and high level modelers have. Yes, they have jewelry tools and builders, but the bottom line fact is that the designer/modeler will have to deal with the functionality of their CAD engine regardless of the tools and builders when making most designs. Jewelry Cad Cam Masters partnered with ZWSOFT, one of the largest CAD developers. Having a 400+ strong workforce, ZWSOFT is dedicated exclusively to the CAD industry with major clients like Siemens, Sony Ericsson, Panasonic, Carrefour and Saint-Gobain, bringing you the latest in technology with 20+ years of industry innovation. Together, we present to you Jewelry CAD Dream, professional jewelry CAD software. Whether a hobbyist, professional jewelry designer or a high volume manufacturer, Jewelry CAD Dream was created with you in mind.

WHAT PRODUCTS DO WE OFFER?

- Jewelry CAD Dream V.13

Jewelry CAD Dream V.13

DESIGNED BY A JEWELER WITH 30+ YEARS EXPERIENCE AT THE BENCH

Jewelry CAD Dream combines a superfast high end hybrid modeling engine with direct modeling, a plethora of jewelry CAD tools, along with high level history based modeling, bringing you the most powerful tools in the jewelry CAD industry. Working in Jewelry CAD Dream you have all of this at your fingertips, in tandem with ultra realistic renderings and animations to showcase your work.

Powerful, robust, all-in-one jewelry design solution.

Bullet Proof Booleans

AUTOMATED BOOLEANS ADD-ON

Many times CAD engines experience difficulty when trying to Boolean Add/Subtract parts for whatever the underlying reason may be. Hence the need for a specialty product; 'Bullet Proof Booleans', embedded within Jewelry CAD Dream, automates Boolean Additions and Subtraction along with making your files ready for 3D printing. The addition of this tool allows for crisp Booleans when importing ZBrush, Mudbox or any OBJ/STL files between a Mesh part and NURBS part in Jewelry CAD Dream.

Jewelry Cad Cam Masters

Software, Training, Support; the Whole Package

Training

LEARN FROM JEWELERS, NOT ENGINEERS

Most Jewelry CAD software packages fall short in two areas; capabilities and training. At Jewelry Cad Cam Masters we believe that you shouldn't have to be an engineer to learn computer design. Yes, we can have you building beautiful designs quickly, but to make very unusual custom models it will take time to become proficient—any powerful tool takes time to learn, you shouldn't have to learn by yourself! JCCM, LLC offers the Jewelry CAD Dream Training Program, designed to help you learn at your own pace.

With the purchase of Jewelry CAD Dream V.13, the user will have access to hundreds of Essential/Basic Online Training Videos PLUS access to the Jewelry CAD Academy; a complete course with over 40 hours of training videos. Or subscribe to the Jewelry CAD Dream Advanced Training program and the user will gain access to all of the additional advance online training material PLUS access to weekly training seminars (and access to all of the previously recorded training seminars).

Thea Render

ULTRA-REALISTIC RENDERING

Jewelry CAD Dream has integrated Thea Rendering technology. Use the 'Export Thea Scene' button to automatically load your design into the standalone 'Thea Studio' and experience an extremely robust and interactive rendering studio with a plethora of professional tools.

JEWELRY COUNTER DESIGN STUDIO

The Jewelry COUNTER Design STUDIO brings a quality and growing library of jewelry designs and components for immediate display to your customers. From the basic designs to more ornate. Modify in real time and have your customer see stunning renders of the finished designs.

Good words, Good People

Testimonials

SEE WHAT SOME OF OUR CUSTOMERS HAVE TO SAY ABOUT JEWELRY CAD DREAM.

"Choosing Jewelry Cad Dream as my Cad program was the best choice I could have made. The program itself is so versatile and is everything you need to make any piece of jewelry your mind can create. I am very impressed with tools the program offers and how fast I have picked it up. The training JCD offers is fantastic, the lessons starts with showing the basics and gradually moves to making fine jewelry. I never missed a step. If I ever had an issue the JCD support team has spent time with me to show me the proper techniques to each component I had trouble with. The service has always been quick, effective and I am extremely appreciative. JCD will be the fastest growing CAD Company for many years to come. Making jewelry via CAD is not only the future, but it is also the most effective way to make jewelry today."

Auston Baca, La Vita Vital, U.S.A.

"I have tried several parametric programs and decided on JCD, because it is clearly laid out and is stable. With Johns Tutorials and his patient help I quickly learned to work with JCD. Compared with Rhino I constructed just as quickly after only a month, now after 6 months I work much more effectively with JCD."

Roland Wittel, Goldschmiede Wittel, Germany

"I wanted to get into computer design because I thought it would be much faster and easier to design. I was right. A necklace that used to take me about a month to model now takes about 2 or 3 days to design using Jewelry CAD Dream. Plus, you can show your customers what the piece will look like, and easily make changes to the design without having to create a whole new model. But I think the most important part of Jewelry CAD Dream for me is the fact that John is so willing to train people on how to use the software. He's a jeweler, he's a setter, and he knows the software. He understands the whole process, and it's difficult to find a company that understands both the program and how to create jewelry. Overall, Jewelry CAD Dream makes my life much easier."

Ramiro Ortega, Finesse Fine Jewelry, U.S.A.

"Not only is Jewelry Cad Dream The best software out there, They saved me tens of thousands of dollars by giving me great advice! Thank you Jewelry Cad Dream!"

William Brown, Cleveland Hotlist Best Jewelry Designer 2015 Winner, U.S.A.

"It's a great program. I checked out some other programs like Matrix or 3D, and found that Jewelry CAD Dream is much more advanced and has a more powerful engine. And with all the updates they put out, it's getting better and better. For the past 30 years, I've done everything by hand but after learning Jewelry CAD Dream, I don't want to go back to the bench. I want to do all my designing on the computer simply because it's faster and easier. It's unbelievable."

Michael Shnyder, Euro Design Jewelry, U.S.A.

"After 30 year experience as a custom designer and a model maker it was hard to imagine how I was able to work before. Jewelry CAD Dream gives me creative freedom, and helps me to see the finished product. It definitely saves a lot of time, and it makes it a lot easier to go back and change something. But I think that support is the number one most important thing because designing jewelry can be very complicated. The support is amazing! John is a great teacher and doesn't give you a hard time when you are trying to learn something. I'm not sure I would have learned as much if it wasn't for him."

Alex Zamsky, Alex & Company, U.S.A.
